

***Les Cahiers: Journal for the Study of Architecture, Urbanism and Landscape***

is an international journal (French-English) that has been serving architectural and urban research for forty years, opening up new paths and queries at the crossroads of different spatial (or urban) planning fields.

The magazine is aimed primarily at schools of architecture, urban planning and landscaping, and researchers working in university departments in France and abroad.

Three annual thematic issues to address lively research fundamental and applied investigations.

Two sections updated in real-time feed the journal's content throughout the year to support lively research.

**Perspectives on Contemporary Research**

Academic articles that present current and unpublished research

Unpublished articles and essays on subjects related to the emergence of new themes and accounts of scholarly methodologies and practices development

Reports of doctoral and post-doctoral theses

Book reviews

**Research Materials**

Republication of texts

Translation of articles previously unpublished

Relevant documents such as logbooks, diaries, and personal journals that might shed light on the activities of researchers in their contemporary contexts

Interviews with scholars and practitioners involved in ongoing research
