

MARCH 28-31 2023

SOFTWARE DN - FIRST TRAINING SCHOOL

Training School on Fundamentals and Wearables

The training school will start with the fundamentals and state-of-the-art of the soft actuator technology including ionic, dielectric and phase-change actuators. Fundamental knowledge on material sciences and their link to functionality and performance will be taught on materials chemistry and on materials physico-chemistry. The state of the art in wearable technology, user cases, and applications as well as the relationship between technology progress in smart materials science and textile/fashion design. Transferable skills training will be offered on sustainability, on Data Management Plan, research ethics and gender training. Finally, a workshop and team building activity to integrate the Researchers will be provided.

Registration fee: 180€ for non-SOFTWARE participants (for lunch, coffee, gala)

Program

MARCH 28th -
Overview on soft
actuator technology

MARCH 29th -
Material and
characterization

MARCH 30th -
Wearable - workshop

MARCH 31th -
Soft skills
